## The Company:

We design, create and communicate — with our heart and mind and a passion for digital media and technology. We have a solid understanding of the diverse digital market and its requirements and guide our customers on their journey to meet their targets. We use our extensive expertise in the field of internet technology to convert brand needs into real customer relationships. The secret to our success lies in combining strategic and technological skills as well as customer needs and solution strategies. After all, we are a one-stop shop for all customer's services. Only through this approach can we ensure the continual success of customer projects – even with last-minute changes to projects and requirements.

The Company seeking to enrich the growing team with a software developer that has the following.

## Your Tasks

As a software developer - TYPO3, you will realize efficient and individual solutions for our customers in your team. TYPO3 is used by many of our existing customers for intranet and internet portals. We need your support to look after and win new customers.

- Development and support of TYPO3 projects
- Design and implementation of new features and extensions
- Further development and maintenance of existing software solutions
- Creation of documents
- Support the software architects

## Required Skills

- Successfully completed studies with a focus on computer science, IT, informatics, or comparable study with professional experience
- Experience in agile software development (SCRUM)
- Very good knowledge in web development, especially TYPO3
- Practical experience with TypoScript as well as the integration and configuration of common TYPO3 extensions
- Good knowledge in the development of web applications with PHP 5 and MySQL
- Very good experience with JavaScript (especially JQuery) as well as HTML5 and CSS
- Very good experience with object-oriented programming
- Good German Language, minimum level B2
- Very good English

## The Company offer

Challenging and interesting tasks as well as a pleasant working environment in an open corporate culture. With a flexible working time model, training opportunities, flat hierarchies and diverse, innovative thematic fields, you will be able to create the best conditions for your career in digital life and business.
