Vacancy: Backend Developer

We, at MEG for Consultancy (Middle East) and Internationals Human Power (Germany), are specialist for international recruiting of high qualified expats for German companies in Germany and Middle East. We support the job applicant through the recruiting and the immigration process in Germany.

Info: German government provide the **Blue Card** for foreigners to immigrate and work in Germany.

For one of our major clients, a German Startup, we are looking as soon as possible for a suitable candidate for the below open vacancy in **Germany-Berlin**.

How to Apply

1. If you fulfil the job's requirements, please register yourself in our applicant Portal and upload the request documents on <https://meg-consultancy.com/start-your-career.html>
2. Add following documents/Info to your profile:
 - CV: Use our CV [template](#) from the applicant portal (after login), and upload the word format.
 - Professional Picture
 - Qualification/Experience certificates
 - Enter the above Job reference and title in "Target job" section in your profile (**Important**).

Deadline: 04.06.2017

For any questions send us an email – In the email's subject add the job reference and title.

Selected candidates will be contacted accordingly.

Note: successful candidate can apply for the Blue Card (work and residency permit) for Germany

Thanks & Good luck

The Company:

Our start-up is a “neighbourhood” network, a new platform for exchange between individuals and businesses in the region. People, organizations and businesses communicate exchange recommendations and make their neighbourhood loveable, alive and safe.

For this we look for you as:

Your Tasks

You afraid of solving problems? You love designing and developing robust and scalable APIs to enable our users to have a perfect front-end application (website and mobile)? For our platform, we are looking for a backend developer who not only performs, but actively contributes to further development.

- Responsible for the development of the back end of the platform as an API for Web & Mobile App
- Ensuring and further developing the software architecture
- Implementing sophisticated data processing for a social network

Required Skills

- Successfully completed studies with a focus on computer science, IT, informatics, communication, or comparable study with professional experience
- Profound practical knowledge in agile development methods
 - Languages: SQL, PHP, JS
 - Framework: PHP Symfony / Silex, NodeJS
- Experience in handling mockups, Interaction prototypes and process charts
- Experience in app development is an advantage
- Experience in deployment, management and in the scaling of hosting environments (AWS-Cloud, Hybrid Cloud, Private Cloud, On-Premise)
- Analytical skills, a structured and result-oriented work as well as a high self-responsibility round off your profile
- Very good English
- German Language is a plus

The Company offer

- The opportunity to actively shape a growing start-up
- Flat hierarchies and very short decision paths
- Beautiful and modern high-end office in the heart of Berlin
- The possibility to set accents and help shape the product right from the start
- A dynamic and highly motivated team with whom you grow
- Flexible working hours
